SOTI MobiControl makes Enterprise Mobility Management (EMM) easy. It simplifies the security and management of your business-critical mobile devices and apps,

as well as your intelligent IoT endpoints.

SOTI MOBICONTROL MANAGES ALL OF YOUR MOBILE DEVICES AND INTELLIGENT IoT ENDPOINTS

Remote control/view devices from 200 different manufacturers. Support the devices that best meet your cost, operating system, form factor and security requirements.

SOTI MOBICONTROL DEPLOYS DEVICES QUICKLY AND CORRECTLY

Get mobile devices into the hands of your workers faster, and make sure they are setup according to company mobility policies. Integration with device OEM rapid enrollment solutions, such as: Android zero-touch enrollment, Apple Automated Device Enrollment, Samsung KME, Windows Autopilot and Zebra StageNow.

SOTI MOBICONTROL REDUCES WORKER DOWNTIME

Use integrated productivity tools and remote support features that reduce worker downtime and keeps them focused on their work. Remote support features such as remote view/control, file sync and two-way chat, fix device and app problems quickly.

SOTI MOBICONTROL MANAGES CONTENT AND APPS

Employ the complete suite of mobile content and app management tools to empower your workers. SOTI XTreme Technology reduces the time it takes to distribute apps and data to remote mobile devices. Use SOTI Hub to create and secure content on the device, and SOTI Surf for secure mobile browsing.

Browsers

- Google
- Chrome
  Mozilla Firefox

Deployment Options

· SOTI MobiControl Cloud: A secure, hosted version which accommodates organizations of all sizes, industries and security requirements.

· Managed Service Provider (MSP) Hosted: Enjoy fast service and response time by leveraging a trusted SOTI MSP solution.

· On-Premise: Install, deploy and maintain SOTI MobiControl using the physical servers in your business location.

Note: Requirements may differ by version of SOTI MobiControl.

WHAT SOTI MOBICONTROL CAN DO

	Optimize System Performance	• The SOTI MobiControl System Health Dashboard1 gives you real-time and 48-hour visibility into operational stats to help you make smart, data-based decisions. 1. Available only to SOTI Premium Plus and Enterprise Plus Service customers
	Multi-OS Support	• Secure and manage your mobile devices and intelligent IoT endpoints (Android, iOS, macOS, Windows and Linux) from a single, integrated user interface.
	Rapid Deployment and Provisioning	• Provision devices remotely using profiles and packages based on user role or geographic location. • Use SOTI Stage and third-party solutions to simplify device deployment. • Plaform and OEM specific solutions for Android zero-touch enrollment (ZTE), Apple Automated Device Enrollment, Samsung Knox Mobile Enrollment (KME), Windows Autopilot and Zebra StageNow.
	App Management	• Deliver the right app to the right employee with tight integrations with Apple App Store License Management and Google Play. • Use blacklists/whitelists to control corporate app availability. • App configuration automates the configuration of an app once it's installed on the device, making it ready to go for the end user.
	Content Management	• Secure corporate files with SOTI Hub. • Secure web content with SOTI Surf. • Create, edit and upload MS Office files and images. • Use LDAP integration to control who sees selected files and websites on their mobile device and what they can do with them.
	Remote Support	• Remote control devices on any HTML-5 based web browser for tablets and smartphones, even with an unreliable Internet connection.
	Device and Data Security	• Prevent rogue apps and malware from infecting your system by controlling what can be installed on a device by using authentication, password and encryption features.
	Enterprise Integration	• Improve the device enrollment experience for end users with SAML integration. • Use LDAP or Azure AD to create policies based on corporate group membership.
	SOTI ONE Integration	• Create incident tickets from within SOTI MobiControl. • Automatically link devices to tickets in SOTI XSight. • Deploy and configure SOTI Snap to Android and iOS devices.
	Complete Android Management	• Support all Android Enterprise (AE) deployment configurations, including: Bring Your Own Device (BYOD), Corporately Owned, Business Only (COBO), Choose Your Own Device (CYOD) and Corporately Owned, Personally Enabled (COPE). • Install apps from Google Play or upload installer files (.apk) directly into SOTI MobiControl.
	Group Location Services	• View the current location of all online devices in a device group at once. • View the last known location of offline devices until they reconnect to SOTI MobiControl.
	Granular Permissions	• Dictate which divisions in your organization have permissions (read, read/write) to users, custom data and custom attributes with greater specificity.
